Languages: French (Native), English (C1, 965/990 TOEIC), Chinese (Intermediate, HSK2)

Summary

Seeking a 2027 summer internship as a Fellow Intern. Passionate about leveraging Tech & AI for strategic transformation. Combining advanced technical acumen (Robotics, GenAI, Edge Computing) with economic modeling to drive data-backed, innovative solutions bridging complex engineering constraints and business objectives.

Education

Tongji University

Double Degree Master's in Mechanical and Robotics Engineering

Shanghai, China

Sept. 2026 – Jan. 2028

Arts et Métiers ParisTech

Master of Science in General Engineering (Grande École program)

France

Sept. 2024 – Jan. 2028

Awarded the Arts et Métiers Excellence Scholarship.

Université Paris Dauphine – PSL

Bachelor's Degree in Applied Economics (Fast-track for Grandes Écoles)

France

Sept. 2025 – June 2026

Centre International de Valbonne

CPGE PCSI/PSI* (Intensive 2-year undergraduate program for French Engineering Graduate Schools)

France

Sept. 2022 – June 2024

Professional Experience

Accenture

Tech & AI Engineering Intern

Sophia Antipolis

June – Aug. 2026

- Architected scalable edge-to-cloud systems integrating GenAI agents and IoT, translating complex automation challenges into strategic deployment roadmaps.
- Developed and trained lightweight Computer Vision models for robotic applications, optimizing inference performance for edge hardware (ESP32, Raspberry Pi).
- Deployed containerized AI microservices on Microsoft Azure, establishing real-time MQTT telemetry pipelines to ensure highly-available data synchronization.

Arkopharma

Production & Continuous Improvement Intern

Carros

June – July 2025

- Ensured a daily throughput of 20 units across 10+ production and packaging lines by directing shift operations and resolving real-time mechanical bottlenecks.
- Identified a 50% potential reduction in energy consumption over 10 years by conducting CSR audits and energy balance assessments across 100+ recycling sites.

Méthodo

Academic Tutor

Aix-en-Provence

Jan. – June 2025

- Coached high school students in advanced Mathematics and Physics, adapting complex scientific concepts into actionable learning frameworks.

Projects & Leadership

Tech & Engineering Projects

- WorldSkills France (Industry 4.0) – Regional winner. Led the automation and system integration of a production line under strict time constraints.
- INNODAY Hackathon Winner (€500) – Designed a multimodal platform for hydrogen production from biomass, balancing technical feasibility with economic viability.
- Cobot Mimic Programming – Programmed a Doosan cobot using Python and Computer Vision (OpenCV, MediaPipe). Led field-testing and demonstrator presentations, successfully onboarding 200+ primary school students (10 classes).
- Rover Design with Thales – Managed chassis study and structural design; presented technical recommendations to engineering teams at the Cannes site.

Extracurriculars

- Leadership – President of Arts et Métiers Angers Robotics Club.
- Field Hockey – Played competitively for 10 years; Indoor N2 French Champion (2022), demonstrating resilience and high-performance teamwork.
- Volunteering – Staff member at Coup de Pouce Antibes (community grocery store).

Technical Skills

Python, SQL, C++, AI/LLM, Computer Vision, Cloud (Azure), IoT (MQTT, TCP), CAD (Catia, SolidWorks)
